ORGANIZED BY

**DEPARTMENT OF MICROBIOLOGY &
HOSPITAL INFECTION CONTROL COMMITTEE
JIPMER, PUDUCHERRY**

Dear Nurses,

Greetings from JIPMER

We are pleased to announce that Department of Microbiology along with the office of HICC (Hospital Infection Control Committee), JIPMER will conduct the '**2nd National Workshop on Hospital Infection Control for Nurses**' between **24th to 26th July 2019** in JIPMER Pondicherry, India. The target group will be **ONLY** infection control nurses from different parts of the country.

Infection Control is an essential component of any health care delivery system. Implementing infection control measures from simple hand washing to high-level disinfection of surgical instruments can prevent transmission of disease in health care settings. Unfortunately, an effective and robust infection control programme is lacking in most of the hospitals.

Nurses play a crucial role in executing and implementing the infection control programme in health care services. Infection control nurses (ICNs) are the pillars of Hospital infection control committee (HICC). ICNs perform rounds, audits, surveillances and ensure the implementation of infection control activities. Unfortunately there are paucity of training program for infection control nurses in India. This workshop aims at training the ICNs across the country on various aspects of hospital infection control which range from hand hygiene, personal protective equipment, HAI Surveillance, bundle care audit, needle stick injury, biomedical waste audit and environmental surveillance.

The number of participants selected for the workshop will be limited to 70. Nurses working in the infection control area only will be considered for this workshop. Credit hours will be awarded to the participants.
