This is to inform you that there will be Video Conferencing CGR Session will be held.

**Date/Time :** 20/04/2019 (Saturday) at 8:00 to 9:00 AM

**Topic :** ‘Neuroblastoma: an interesting malignant solid tumor of childhood and its spectrum’

**Summary :** Compared with cancers of adults, childhood cancers are rare comprising only 1% of all the cancers but causes >10% of all deaths in children below 15-year of age (2nd most leading cause of death). In the developing world, childhood cancers are yet to be recognized as a major paediatric illness. In developed countries, childhood cancer has a mortality of approximately 20% of cases while in low resource settings, mortality is approximately 80% or even 90% in the world's poorest countries. Many paediatric solid tumours are referred to as embryonic / genetic or developmental cancers and have better prognosis due to better response to therapy. Neuroblastoma is the most common extra cranial paediatric solid tumor arises from neural crest cell. It is a biological tumor and have diverse spectrum of clinical presentation ranging from auto-regression to rapidly progressive disease with dismal outcome. We are presenting our experience with series of interesting cases of Neuroblastoma presenting as asymptomatic abdominal mass to symptoms of paraneoplastic syndrome.

**Between :** SGPGIMS, Lucknow – KEM, Mumbai - SRMC, Chennai - IGMC Shimla, AIMS Kochi, CMC, Vellore - Hindalco Hospital, Renukoot. UP – JIPMER, Puducherry.
