

CORRIGENDUM

TO THE TENDER DOCUMENT TITLED: NOCI REGISTRY

Tender reference number: NOCI/ 2021/ Registry-1

Tender ID (on the Central Public Procurement Portal): 2021_JIPMP_630046_1

Date of publication of the tender: 19 May 2021

Date of corrigendum: 29 5 2021

In the tender published vide NOCI/ 2021/ Registry-1, dated 19-5-2021. The following corrections are made in the tender document.

<i>Earlier statement (with location in the document)</i>	<i>Changed statement</i>
SECTION VII. 2.1.O. (page 50) The selected bidder shall provide training to Administrators and Users of the Application in all the 6 sites	The selected bidder shall provide training to Administrators and Users of the Application in all the 6 sites. This would involve online training for all planned users. The vendor must provide post-training certification for users. In addition, the vendor must visit the lead site (JIPMER) at least 3 visits per year during the first 3 years and yearly once after that.
SECTION annexure I: A: Table point 2: FINANCIAL STRENGTH OF THE ORGANISATION reflecting the following Profitable business in the past years Profit in 2 out of 3 years (2018-19 and before) Annual turnover at least 1 crore Page no: 79 Annexure II: A.4 Table for Marking Criteria for Sl. No. 1: 1 to 4.99	FINANCIAL STRENGTH OF THE ORGANISATION reflecting the following Profitable business in the past years Profit in 2 out of 3 years (2018-19 and before) Annual turnover in 2 of 3 years at least 80 lakhs, While entering the marking criteria, minimum criteria will be shown as 1. Any vendor with annual turnover showing >80 lakhs to make entry as 1. Page no: 79 Annexure II: A.4 Table for Marking Criteria for Sl. No. 1 : Change to 0.8 to 4.99 for Annual Turnover
Page 49: Section VII.2.1.p. The period of contract for creation and modification of databases is for 3 years. However, maintenance of the databases must extend to another 2 years.	The period of contract for creation and modification of databases is for 3 years. Maintenance of the databases should continue beyond that. Since it is expected that major software update would be required after 5 years, it must be done at the end of 5 years. Maintenance should be considered for a total of 7 years beyond the development phase.

<p>Page 55. Section VII.15.a.</p> <p>a) Maintenance support for the modules already created should continue for an additional 7 years and the quoted prices will include these maintenance period. Maintenance includes</p> <p>a. Continued trouble shooting during data entry processes (as mentioned under heading “support and operations”)</p> <p>b. Support for upgradation of web application, if any which may be done during this period</p> <p>c. This period of 2 years does not envisage creation of new modules</p> <p>d. The price quoted must be inclusive of this additional cost</p>	<p>a) Maintenance support for the modules already created should continue for an additional 7 years and the quoted prices will include these maintenance period. Maintenance includes</p> <p>a. Continued trouble shooting during data entry processes (as mentioned under heading “support and operations”)</p> <p>b. Major software upgrade must be considered and the cost for this must be quoted separately as part of the tender document</p> <p>c. This period of 2 years does not envisage creation of new modules- however the original development was planned for 25 modules, if any of these original ones are not yet developed, or incompletely developed, they must be completed within this period. The users will provide the templates which need to be developed and the vendor will interact and work with the users so that a suitable digital database is created. The same applies to the prospective databases to be developed as mentioned in Format 14. point number 24.</p> <p>d. The price quoted must be inclusive of this additional cost</p>
<p>Page 46. SECITON V.7 Special condition of contract. Expected timeline of design, implementation and Support of the Platform. Point d.</p> <p>d) All other proposed cancer type CRFs should be designed and rolled out within 12 months</p>	<p>d) All other proposed cancer type modules should be designed and rolled out over next 24 months. Those modules which are not completed / not fully developed within the first 3 years (upto a maximum of 25 modules) will have to be completed during the maintenance period and this would not be considered as “new” module development and no extra cost would be considered for this development.</p>
<p>Page 47. SECITON V.7 Special condition of contract. Expected timeline of design, implementation and Support of the Platform. Table showing timelines.</p>	<p>Additional point added in the table: Completion of modules which were started earlier upto a maximum of 25 modules</p>
<p>Page 92: Annexure IV. Payment terms and penalty. A. Payment terms. Point iii</p> <p>iii. Annual maintenance cost for 4th to 10th years should be quoted separately. NPV (Net present value) method will be used for calculating the lowest bidder (L1) and will include the AMC for 4th to 10th year</p> <p>Page 92. Section 11. A.4</p>	<p>iii. Annual maintenance cost for 4th to 10th years should be quoted separately. NPV (Net present value) method will be used for calculating the lowest bidder (L1) and will include the AMC for 4th to 10th year. Additionally, cost for major upgradation of the software should be quoted as proportion of the original cost (to a maximum of 20% of the original software development without the AMC). This will also be included in the calculation of the L1.</p> <p>Software upgradation cost has been included in the components of costing (Section 11A.iv)</p>

<p>Page 55. Section VII.14 14. Process Operations Response Times: Sizing and capability of the Solution and Hardware deployed would be such that the solution is able to deliver the web page or screen output at the user end within 5 seconds of query or request submission under ideal condition.</p>	<p>14. Process Operations Response Times: Sizing and capability of the Solution and Hardware deployed would be such that the solution is able to deliver the web page or screen output at the user end within a reasonable time of query or request submission under ideal condition.</p>
<p>Page 32. Section II. General Instructions to Tenderers. Clause 36.A Preference for MSME</p>	<p>Added sentence: d. Preference to MSME will be decided by competent committee.</p>
<p>Page 35. Section II. F. 41.c c. The selected vendor must also provide within 15 days of award of tender the signed SLA, indemnity and other documents as per Annexure V.</p>	<p>Section II. F. 41.c Added sentence: Changes made in the main tender document will apply to the Service level Agreement also at various sections as relevant and will be modified accordingly at the time of signature of the SLA. The provided SLA is a draft version and the final version will incorporate changes as per the corrigendum published in the main tender document and will have details of the selected vendor.</p>
