PUDUCHERRY

An array of global neuro-rehabilitation experts, clinicians, researchers, and technologists will explore the intersection of neuroscience, rehabilitation, and technology and discuss the future of the domain of expertise at a three-day conference beginning at JIPMER on Friday.

IFNRCON 2024, the 12th annual conference of the Indian Federation of Neurorehabilitation, hosted jointly with the Neurorehabilitation subsection of the Indian Academy of Neurology, is on theme of 'Transforming Rehabilitation Through Technology'.

The event will delve into the innovative applications of technology in neurorehabilitation and is open to researchers, clinicians, engineers and students.

The neurorehabilitation conference is a platform where the latest advancements in technology intersect with the noble pursuit of enhancing rehabilitation outcomes, said Sunil K. Narayan, organising chair.

"By bringing together diverse stakeholders, we aim to catalyse innovation and drive progress towards more effective, and patient-centered neurorehabilitation solutions," adds Guhan Ramamurthy, organising secretary.

Volker Hoemberg, president, World Federation of Neurorehabilitation, will preside over the inaugural ceremony in the presence of IFNR president Nirmal Surya, Abhishek Shrivastava, secretary and the Chair of Neurorehabilitation subsection of Indian Academy of Neurology, and Rakesh Aggarwal, the Director of JIPMER.
