Poster competition for the second year MBBS students, JIPMER

E Posters made by students on Medication Error and Importance of Pharmacovigilance in India

Importance of Pharmacovigilance in Indian population

Why do we need Pharmacovigilance?

- Global pharmaceutical companies have found India to be a preferred destination for clinical trials
- Currently accounts for 8% of global pharmaceutical production being 4th in the world

There are challenges at all 5 levels of pharmacovigilance

COLLECTION

DETECTION

ASSESSMENT

MONITORING

PREVENTION

India is large!

1.38 billion people
3.287 million km²

Unawareness & Under reporting

A large proportion of the population is illiterate

Low availability of funds & less ADRs monitoring centers

Only about 346 AMCs available

Many drug companies do not submit their study report or just abandon unfinished!

Postmarketing surveillance is not trusted

Involves more than just one solution!

Drug alert & Warning
Withdrawal of drugs
Forming advisories

MEDICATION ERRORS

0
who knows
what slumbers in
the background of
the times

Select the correct drug
based on the
patients allergies and
other indications

Be careful with
look alike drugs or
you're gonna
get them wrong!

**TOTAL
ERRORS
5.2M
per year**

If your doctor writes
you a prescription, make sure
you can read it

NEVER
be afraid to
ask questions

Confirm the patients
weight and
prescribe accordingly
