This is to inform you that there will be Video Conferencing Session will be held.

Date/Time : 10/08/2019 (Saturday) at 8:00 AM to 9:00 AM

Topic : ‘Stuck valve (Prosthetic valve thrombosis: Our experience)’

Summary: Mechanical prosthetic valve replacement is a common operation performed in rheumatic heart valve disease. Though it is free of any major structural valve degeneration, it requires anticoagulation for life for it to function normally. Prosthetic valve thrombosis is a serious complication that may arise because of several reasons, but is potentially lethal. The patient present in emergency with deranged hemodynamics and severe symptoms. These patients are managed by either thrombolysis or operation. Department will be present his experience with this fatal condition between years 2012 and 2018.
