This is to inform you that there will be Video Conferencing (CGR) Session will be held.

**Date & Time :** 02/03/2019 & 8:00 to 9:00 am

**Topic** **: "Encephalitis: Is there more than meets the eye?"**

**Summary** **:** The nuances of the human brain with its myriad connections have enthralled many neurologists and researchers over centuries. Encephalitis with its impairment of cognition and consciousness, along with the dreaded convulsions has struck dismay into the heart of many young doctors in the emergency rooms and wards, especially due to the high mortality and morbidity if not treated emergently. Over the past few years, the etiology of encephalitis has been broadening and has now engulfed autoimmunity as one of its causes. Many patients confidently diagnosed as infective encephalitis, organic psychosis and dementia are now being reviewed, and are improving with effective treatment. How many cases are we missing still? Are we looking at something we had always seen but not recognized? Let us take a peep and see
